Dear Ken;

Here are two draft copies of the report of Phase I of the maintenance study. This will give you and others an opportunity to review it and make comments before the final version is prepared following my next visit 8 through 19 March.

Section 5 describes briefly the tasks and the effort which are necessary to complete the job properly. As soon as we can get agreement on this part, contract arrangements for Phase II should get under way. You will note the report follows closely the problems outlined in the memo of 22 January 1965.

The report was purposely kept rather general to avoid security complications.

Very truly yours,
